WHAT IS LVT?

LVT is by nature a hard and brittle material consisting of a mixture of petroleum (43%) and salt (57%). Adding bio-based plasticisers makes the product flexible and suitable for high-performance flooring solutions. The result? Light, strong and long-lasting LVT floors.

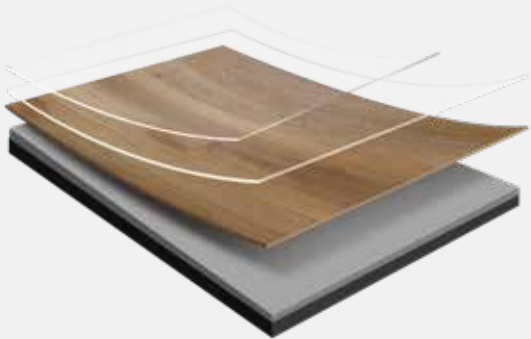

Our floors are available in various patterns such as herringbone, long planks, chevron and tiles. Our dryback floors consist of of four layers which together ensure a sturdy base:

- PU layer:** Offers extra protection and ensures realistic embossing.
- Wear layer:** Makes the floor scratch-resistant and suitable for heavy use.
- Film layer:** Reveals colour and texture for a true-to-life look.
- LVT backing:** Provides stability and optimum sound damping.

Finishing is achieved with attention to detail, ensuring each plank has the right dimensions, bevel and matte finish. This guarantees a floor that not only looks good, but also offers long-lasting comfort and quality.

DRYBACK

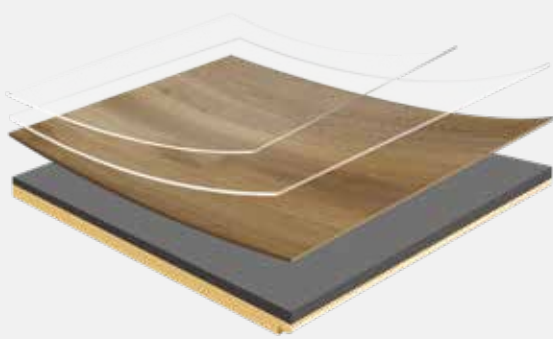

Dryback LVT is a glued flooring. This floor is sound-absorbent and very easy to maintain. To install a dryback floor, a level substrate is very important. Dryback LVT is suitable for domestic use, but also for project-based applications. This floor can be combined with underfloor heating.

- 01. matt PU layer
- 02. wear layer
- 03. film layer with design
- 04. LVT backing

RIGID CLICK

Rigid Click is a smart assembly solution that make the use of adhesive unnecessary. The planks or tiles are easily clicked together using a reliable Uniclic system. A Rigid Click floor is very easy to install, suitable for heavy use and damp-resistant.

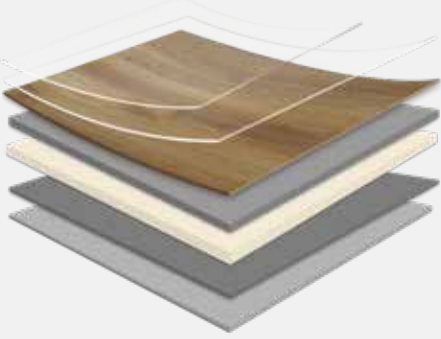

- 01. matt PU layer
- 02. wear layer
- 03. film layer with design
- 04. Rigid board

LOOSE LAY

Loose Lay offers convenience and comfort because of its fast and simple method of installation. Because of the weight, the planks and tiles are laid loose. The durability of LVT ensures that the floor lasts a long time, even with intensive wear. This makes these floors ideal for project-based purposes, but also for temporary purposes.

- 01. matt PU layer
- 02. wear layer
- 03. film layer with design
- 04. vinyl base layer
- 05. fibreglass layer
- 06. extra vinyl layer
- 07. fibreglass layer

EXPERTISE IN LVT FLOORING

designed with a story

Therdex aims to provide consumers, architects and designers with a wide-ranging and varied collection. We do this by continuous innovation so as to offer the best possible flooring product. Bringing together professional expertise and employing modern production techniques allows us to offer a special and unique product.

01.

appearance

Each design is carefully created by experienced graphic designers. Whether you choose an exclusive premier oak pattern, an authentic knot design or a sleek uni-concrete tile, there's a story behind every design.

02.

colours

Appearance and colours are carefully matched. Current trends are combined with a keen eye for detail to ensure a natural and authentic look. Every design is carefully assessed so that the colours complement the pattern perfectly, giving the floor a realistic and stylish character.

03.

dimensions

The dimensions of a plank are essential to the final result. It is important to check that the design fits well with different laying patterns, such as chevron or XL planks, to create a harmonious effect.

04.

variants

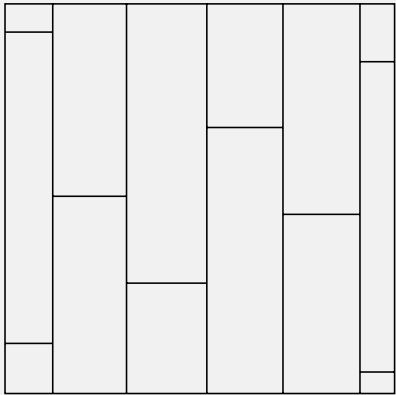

Therdex offers LVT flooring in variants such as dryback, Rigid Click and Loose Lay. For each floor type, we have an appropriate installation solution.

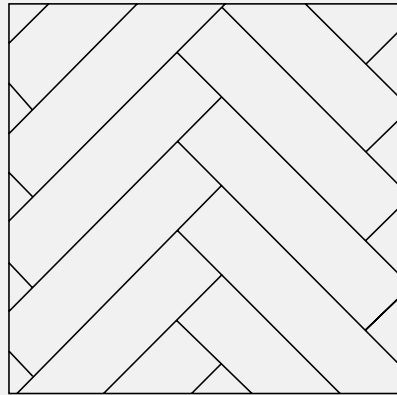

CREATE AND COMBINE

The floor pattern largely determines the look of your interior. With many laying methods, you can bring your personal style to life to create a unique ambiance.

OUR DESIGN TOOLS

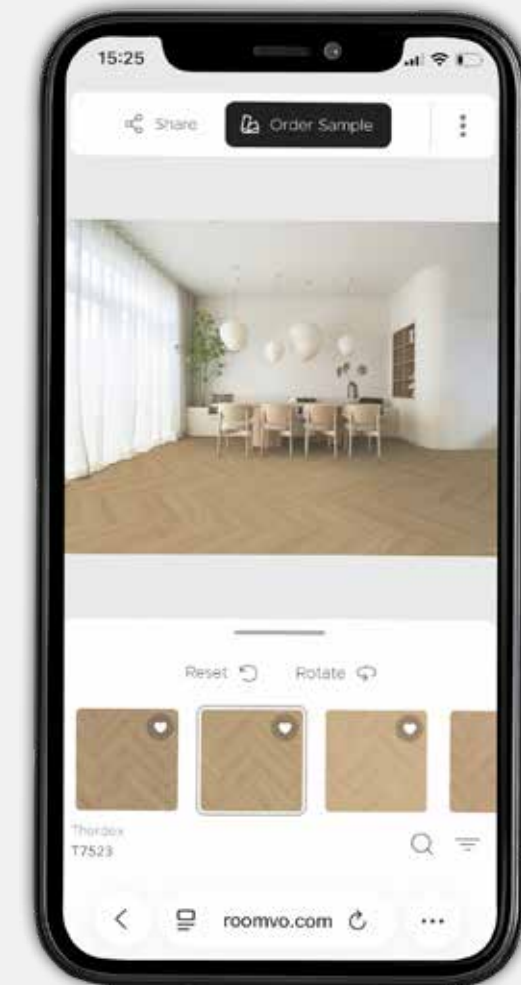

Therdex offers more than wide-ranging collections. We make it as easy as possible for our customers to choose their products. Not only does this include our free sample service but also our room visualizer and 3D textures. Everything is set up to make a choice as easy as possible.

Use our room visualizer:

01. Go to therdex.nl/roomvisualizer
02. Upload an inspirational image or an existing space
03. Select your preferred flooring
04. Obtain a unique view of the renovated interior

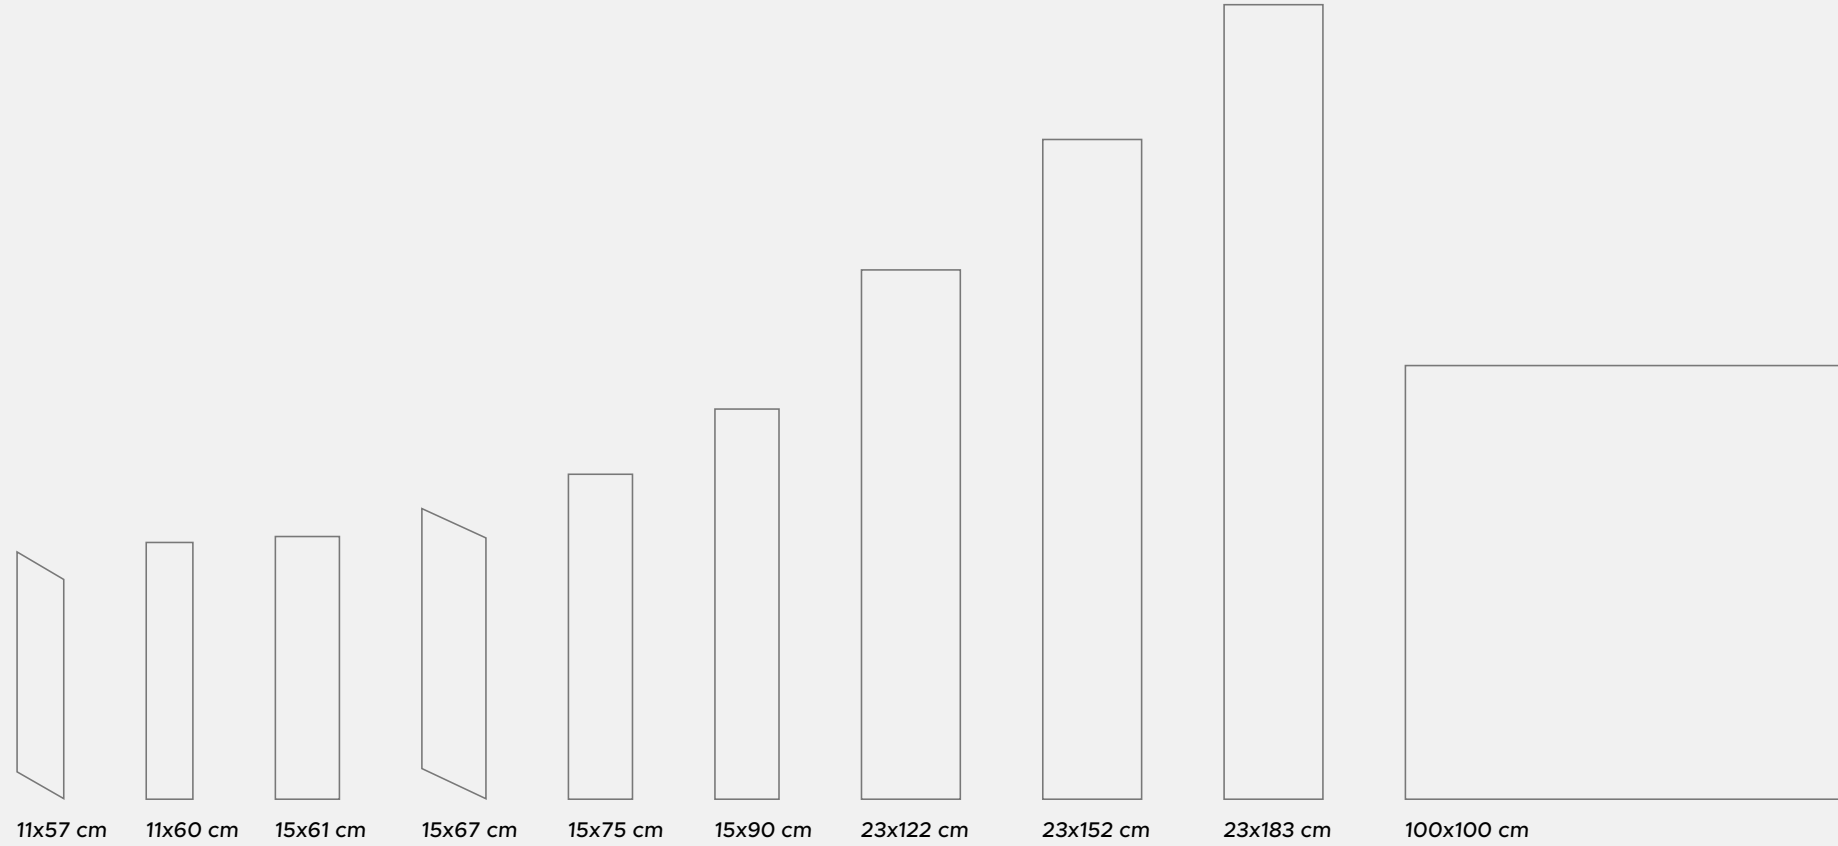

Scan the QR code to go directly to the room visualizer.

DIMENSIONS

Therdex offers an extensive selection of plank and tile sizes in its dryback collection. So there's always a solution that fits seamlessly with your needs and your chosen style.

Floor: Stone² 10051

Floor: XstraLong 18090

THE FIVE BENEFITS OF THERDEX

01.

indistinguishable from the real thing

When you opt for Therdex, you're choosing a floor with a completely natural appearance. The entire collection has appropriate embossing. That means the structure is visible and tangible, making our floors indistinguishable from the real thing.

02.

always available in several variants

The entire collection is available in a range of variants. This offers exceptional possibilities. Designs are available in multiple sizes, so they can be flawlessly combined.

03.

phthalate-free due bio-based plasticisers

Therdex uses responsible, biodegradable plasticisers based on soya oil. These plasticisers make the materials elastic and flexible. These plasticisers are harmless to humans and the environment, as well as being biodegradable.

04.

easy to maintain and streak-free

All Therdex floors are constructed in layers. The topmost layers protect the floor from heavy use and are scratch-resistant. This combination creates an easily maintained floor; simple and convenient.

05.

free, no-obligation sample service

Discover the colour and experience the natural look of a Therdex floor. Samples can be ordered completely free of charge and without obligation from our website. We'll be happy to help you to make the right choice.

DURABLE RESPONSIBLE

The floor is a defining aspect of your interior and should therefore be chosen with care. A Therdex LVT floor not only offers style and appearance, but is also a durable and high-performance product.

What is LVT?

PVC (polyvinyl chloride) is a material consisting of a mixture of petroleum (43%) and salt (57%). Adding bio-based plasticisers makes it strong and flexible. Therdex uses sustainable plasticisers based on soya oil, so your floors are both sturdy and eco-friendly.

A Therdex LVT floor therefore stands for style, quality and sustainability. So you'll be making a choice that benefits both your interior and the environment.

ECO-FRIENDLY

Therdex is fully committed to environmentally conscious production and uses safe, green materials such as bio-based plasticisers.

LONG LIFETIME

LVT floors are hard-wearing and will last for years, even with heavy use.

Floor: Rustique² 7572

QUALITY AND CERTIFICATIONS

At Therdex, quality comes first. We therefore attach great value to the quality labels that our floors bear. These labels guarantee not only a high-quality finish, but also that the floors meet strict requirements in the the field of safety, durability and environmental friendliness.

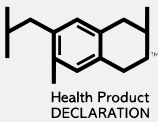

By choosing a Therdex LVT floor, you are assured of a product that:

- 01. Achieves stringent quality standards.
- 02. Is produced sustainably and environmentally friendly.
- 03. Is safe for people and the environment through the use of bio-softeners.

This focus on quality and certification makes Therdex a reliable choice for those looking for a stylish and durable floor.

FROM HOME TO DREAM RESIDENCE

The wish for this house was an open space with a luxurious and warm feel. This was achieved by removing walls and relocating them. In addition, the extension contributes to the spatial result. The warmth of the house can be found in the walls, the bronze doors of the custom made kitchen and the oak look of the Rustique² 7572 floor.

Interior design

CentaineCreations

MODULAR COLLECTION

Rigid Click en Loose Lay floors

A SMART SOLUTION

A floor provides comfort for many years. The focus of Therdex LVT floors is on ease of use, which starts when the floor is laid.

Therdex Rigid Click floors are very easy to install, and make the use of adhesive unnecessary due to a reliable Uniclic system.

Our Loose Lay floors offer convenience and comfort because of their fast and simple method of installation. Because of the weight and combination with the underlayment, the planks and tiles are laid loose.

Therdex Modular floors are re-usable and simple to install, remove and replace. That makes Therdex prized by architects, designers and interior design enthusiasts looking for a distinctive and durable floor.

01.

RIGID CLICK

Rigid Click floors use a smart mounting solution, making the use of glue unnecessary. The planks or tiles are easily clicked together using a reliable Uniclic system. Available in tiles, herringbone, chevron and various long plank formats.

- 01. damp-resistant
- 02. Uniclic click system
- 03. reduces contact noise to 10 dB (when used with an underlay, such as RedFloor)
- 04. 0.55 mm top layer for heavy use

02.

LOOSE LAY

The Loose Lay series offers convenience and comfort because of its fast and simple method of installation. Because of the weight, the planks and tiles are laid loose. The durability of LVT ensures that the floor lasts a long time, even with intensive wear. This series is thus ideal for project-based purposes.

- 01. simple installation
- 02. easy to re-use
- 03. reduced contact noise
- 04. easy to maintain

HOTEL WITH ALLURE

The warm wooden floor Wood W70060 gives the lobby an inviting appearance. The result is a space that exudes class while remaining perfectly suited for intensive daily use.

THERDEX *STAIR RENOVATIONS*

THERDEX *STAIR RENOVATIONS*

Therdex stair renovations ensure a high quality finish for your staircase. Within this collection, you can choose from various stair renovation options, namely Therdex slabs and stair treads. Both options offer an elegant appearance and meet modern safety requirements.

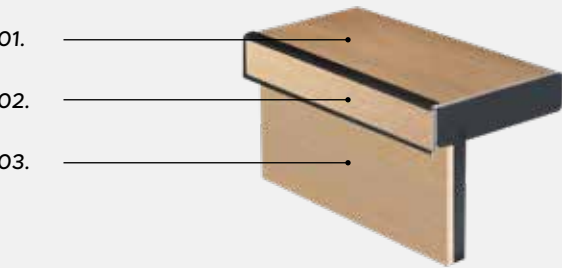

The slabs and stair treads seamlessly match Therdex LVT floors by using the same design. Currently, all colours from the Premier Series are available for stair renovation, both as slabs and as MDF stair treads.

The trusted anti slip properties of Therdex floors also provide extra grip, stability and safety on the stairs. In addition, the staircase is easy to clean, scratch and stain resistant, and retains its appearance over time. Our products are free from phthalates, making them a responsible choice.

CONSTRUCTION

DRYBACK LVT SLABS

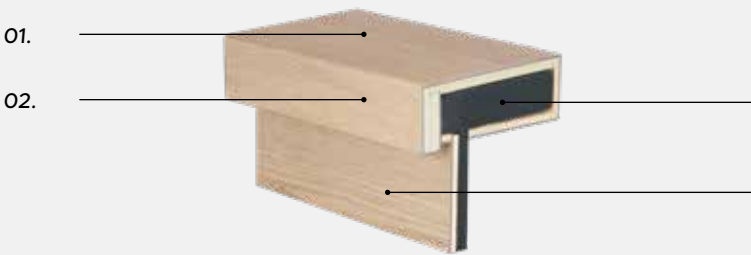

LVT slabs are ideal for stair renovations and offer a finish that matches the quality of our high end floors. The large LVT panel is applied in a single piece, creating a clean and seamless result on both threads and risers.

- 01. LVT plank
- 02. LVT stair nose
- 03. LVT riser

MDF STAIR TREADS

MDF stair treads offer a sleek, seamless finish thanks to their unique one-piece design. The sturdy MDF base provides stability, while the wear-resistant LVT top layer protects the steps from wear and tear. A transparent PU layer offers extra protection and a natural-looking embossing.

- 01. tread top
- 02. stair nose
- 03. tread bottom
- 04. riser

STAIR RENOVATION COLLECTION

The Premier series and Select series in our collection offer a unique opportunity to perfectly coordinate your staircase and floor. These series give your staircase the same refined, matt finish as your floor, creating a cohesive look that radiates luxury and unity.
